## HOT BALL - Stainless steel hot ball - Ø 35 mm

Ref.: 261255

Gencod 3476060026125

UPC: 6

To make a 40 mm diameter channel on insulating materials behind plasterboard without damaging them.

PERFECT to make your multimedia connections, switch and socket installations invisible.

TIME-SAVING = no need to groove the wall and to repaint it.

STEP 1: drill two 40 mm diameter holes on the plasterboard, in vertical way to each other with maximum 2,50 m width.

STEP 2 : uniformly heat the hot ball surface with a welding torch during 3 minutes.

STEP 3 : insert the hot ball into the hole above. The hot ball melts the polystyrene to make a channel connecting the 2 holes.
