

HOT BALL - Stainless steel hot ball - Ø 35 mm

Reference: 261255 EAN13: 3476060026125

UPC: 6

To make a 40 mm diameter channel on insulating materials behind plasterboard without damaging them.

Perfect to make your multimedia connections, switch and socket installations invisible.

Time-saving = no need to groove the wall and to repaint it.

Step 1: drill two 40 mm diameter holes on the plasterboard, in vertical way to each other with maximum 2,50 m width.

Step 2 : uniformly heat the hot ball surface with a welding torch during 3 minutes.

Step 3 : insert the hot ball into the hole above. The hot ball melts the polystyrene to make a channel connecting the 2 holes.
